NAME
pstrcat, pstrncat – concatenate strings, returning pointer to end

SYNOPSIS
cc -c -I/home/5156/rabsonlib ...
c -o ... -L/home/5156/rabsonlib -lrabson
#include <rabsonlib.h>

char *pstrcat(char *dest, char *src);
char *pstrncat(char *dest, char *src, int n);

DESCRIPTION
These functions serve the same purposes as strcat(3) and strncat(3) but return a pointer to the end rather than the beginning of the destination string, dest.

SEE ALSO
strcat(3) strncat(3)
